Office and Warehouse is a full service supplier - from planning, to CAD drawings, to installation, to service.

**Efficiency**

Vertical carousels can greatly increase office filing and storage efficiency by reducing the time it takes to search through numerous rows or even separate rooms of standard office filing equipment. The result is high density storage in reduced floor space which increases workers efficiency by eliminating walk and search times.

**Operation**

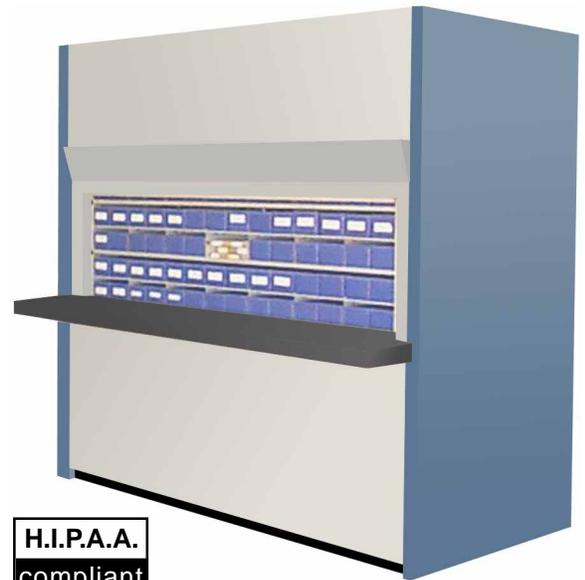

With a simple touch of a button the internal carousel rotates to the requested shelf and in seconds operating personnel have access to stored items.

**Security**

A slide down front panel with an attached keyed lock prevents unauthorized access to the unit.

**Reduced Floor Space**

Vertical carousels can greatly reduce the required floor space it takes to store commonly requested office and filing items into a single centralized unit. With only a small footprint, vertical carousels use cheaper and more available vertical air space as compared to expensive and congested floor space. Standard units easily fit within smaller room heights but can be easily configured to extend through ceiling tile - dramatically increasing overall storage capacity while maintaining the same floor footprint.

**Configuration Options**

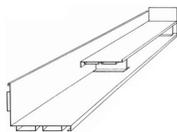

A great feature of vertical carousels is the ability to configure each unit for many different applications. One unit can be individually outfitted for a variety of storage applications while each internal carrier shelf within each unit can be individually configured for different storage options:

- ◆ Folders - letter/legal end tab and hanging
- ◆ Checks, cards, microfiche, CD-Roms
- ◆ Binders, Books, Periodicals
- ◆ Mail and Literature Shelving
- ◆ Audio and Video Tapes
- ◆ Pharmaceutical
